

[MARKBERNDT]

CREATE AN ADJUSTABLE DIFFUSION LAYER

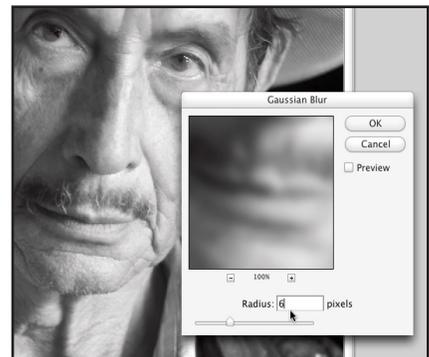

1. **OPEN** AN IMAGE FILE which you want to diffuse. CREATE A COMP LAYER (see COMP LAYER pdf) as the top layer in the layers palette.

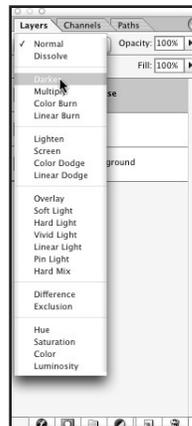

2. DUPLICATE the COMP LAYER, and name it “diffuse”

3. Choose **FILTER>BLUR>GAUSSIAN BLUR** and set “6.0” in the dialogue box for the filter, then click okay.

4. CHANGE the layer mode of the “diffuse” layer to DARKEN.

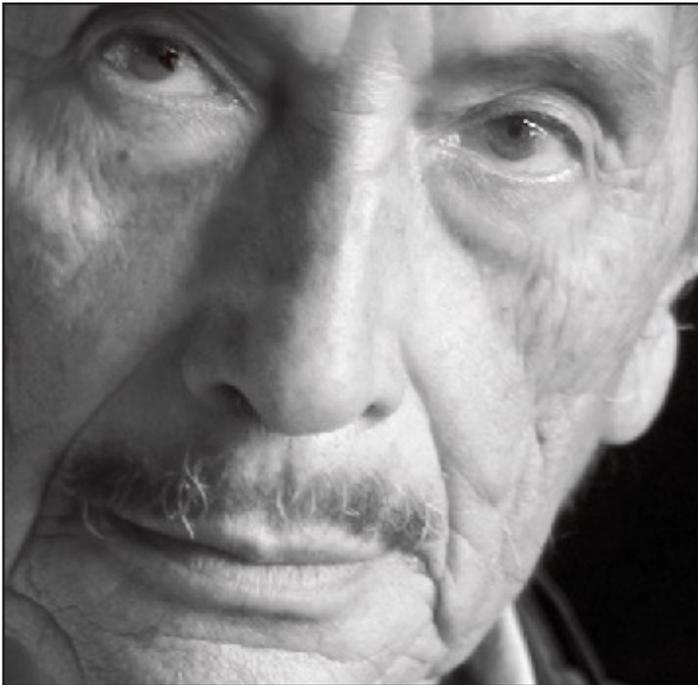

[MARKBERNDT]

5. ADJUST the OPACITY to create the proper amount of diffusion for your image.
